Custom Labels for Products

Products · https://spos.pk/docs/custom-labels-for-products/

Custom labels let you decide exactly what appears on a product label, instead of using the standard layout. You can add your shop name, a product description, a custom price or a special message, so the label suits your products and your customers.

Custom labels for products

1. Go to **Products** from the Smart POS main menu and select the products you want custom labels for.
2. Open the label settings and choose a custom label template, or create a new one with the fields you want to show.
3. Add the details you need on the label, such as your shop name, the product name, price, barcode or a short note.
4. Preview the custom label to check the text fits, the price is correct and the barcode is clear.
5. Print the labels, stick them on the products and scan one at the POS screen to confirm it opens the right product.

Tip: Keep custom labels short and easy to read, and print one test label before printing a full batch.
