Featured Products in POS screen

POS & Sales · https://spos.pk/docs/featured-products-in-pos-screen/

Featured products are the items you want staff to reach first on the POS screen: your best sellers, promotions and seasonal lines. Showing them prominently means the cashier can add them to a sale with one tap, instead of searching through the whole catalogue.

Featured products in POS screen

1. Go to **Products** from the Smart POS main menu and open a product you want to feature.
2. Mark the product as featured in its settings, so Smart POS knows to show it in the featured section of the POS screen.
3. Repeat the same step for your other best sellers and current promotions, keeping the list short so it stays easy to scan.
4. Open the POS screen and check that the featured products appear where staff can reach them quickly.
5. Update the featured list regularly, removing items that are out of stock and adding new promotions as they start.

Tip: Feature only a small set of fast-moving or promoted products, so the POS screen stays clear and the cashier can work quickly.
