How to delete products from Smart POS?

Products · https://spos.pk/docs/how-to-delete-products-from-smart-pos/

Sometimes a product is discontinued, was entered by mistake, or is no longer sold, and it needs to be removed from Smart POS. Before you delete anything, check whether the product has sales or purchase history, because deleting it will also remove it from product lists and the POS screen.

How to delete products from Smart POS

1. Go to **Products** from the Smart POS main menu and find the product you want to remove.
2. Open the product to check its stock and recent transactions, and make sure it is not needed for any open sale or purchase.
3. If the product still has stock, adjust or transfer that stock first so your stock records stay correct.
4. From the products list, select the product and choose the delete option, then confirm the deletion when Smart POS asks you to.
5. Check the products list and the POS screen afterwards to confirm the product no longer appears.

Tip: If a product has a long sales history you may need later, consider deactivating it or setting its stock to zero instead of deleting it.
