Rack, Row & Position of product

Products · https://spos.pk/docs/rack-row-position-of-product/

Video guide: This article is a video guide. Rack, row and position let you record exactly where each product is stored in your shop or warehouse, so staff can find items quickly when picking stock for a sale or counting stock.

Rack, row and position of product

Watch the video guide to see how to set the rack, row and position for a product in Smart POS, and how the recorded location helps your team find stock on the shelf without searching.

Tip: Use the same naming for racks, rows and positions across all your branches, so stock locations are easy to read and remember.
