Service Staff Timer

Restaurant Features · https://spos.pk/docs/service-staff-timer/

The service staff timer in Smart POS tracks how long service staff take on an order, from the moment it is taken until it is served. It helps restaurant managers see how quickly tables are being looked after and where service can be improved.

Service staff timer

The timer runs alongside the service staff features in Smart POS, giving managers a simple view of service times for each order and each member of staff.
